Navi Mumbai, Maharashtra

Summary

A electronics and telecommunication Engineering Student with an Extensive knowledge about high level programming languages like C,C++, HTML,CSS, JAVASCRIPT, Data structures and having an experience in web developing projects.

Education

B.Tech. – Electronics and Telecommunication Engineering (2021-2025)

University of Mumbai, Pillai College of Engineering

HSC- CHANGU KANA THAKUR JR COLLEGE (2019 - 2020)

SSC- CHANGU KANA THAKUR SCHOOL (2007-2018)

Skills

Programming languages

- C. C++, DSA
- Java Script

Web Development

-HTML
- CSS

Projects

Spotify clone app

created a musicplayer website called "Harmoniq," concentrating on frontend development with HTML/CSS and JavaScript. Strong web development and UI design skills are demonstrated by the implemented features, which include user authentication, music management, and a responsive user interface.

Web-Based Signature Application

Developed a web-based signature application that enables users to create, customize, and save digital signatures.

Password Generator app

Developed a responsive password generator application called "PassWiz" using HTML, CSS, and JavaScript. Where user can create a strong password.

Musical Water Fountain

Made a IOT based project called "Musical Water Fountain" that synchronizes water patterns with music. To implement this project the hardware component like arduino microcontroller , sound sensor and relay module are used.

Courses & Certifications

- C
- C++
- DSA in C++
